Get out-of-the-box insights for Dynamics 365 Finance and Operations

AVANADE ADVANCED BUSINESS INSIGHTS (AABI)

## Accelerate the financial modeling and reporting that matters to your business

Unlock insights faster with Avanade Advanced Business Insights (AABI), an extensible, out-of-the-box BI solution for Dynamics 365 that accelerates an otherwise lengthy process for BI modeling and report creation.

Our pre-built, scalable data models are designed for a wide array of Dynamics 365 business areas and processes.

You can easily extend AABI to include your own data and analytics, while sample reports and templates accelerate the analytics development process — all supported by data model documentation.

AABI quickly gives you reporting accuracy into the trends and metrics that drive your business.

What's standing between you and the insights you need?

1
......

Do you have access to all the data you need to drive insights into your company's overall financial health?

2
......

Do you have an easy way to develop customized dashboards and reports?
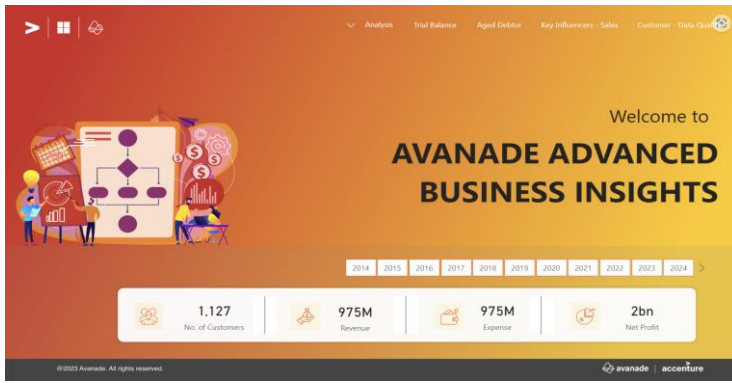

3
......

Do you lack specialized knowledge and staff to do more with data modeling and advanced reporting?

4
......

Could you benefit from a true out-of-the-box Business Insights solution for Dynamics 365?

Drive real business value

1 Accelerate modeling and reporting
Eliminate the need for lengthy processes to develop BI models, Interactive dashboards and drill-down reports

2 Simplify and streamline your efforts
Take advantage of an out-of-the-box solution that doesn't rely on IT, data experts or extensive modeling

3 Empower users
Manage data feeds and sources with just Power BI report author and Dynamics 365 administrator skills

4 Improve reporting accuracy
Get real-time visibility into important trends and metrics with shared models, dashboards, and reports

5 Reduce costs and get real ROI
Reduce implementation costs and uncover new opportunities with faster time to value and visibility

Why Avanade Advanced Business Insights?

AABI is hosted on a BI platform on Azure with a user-friendly, intuitive interface, and it was developed in standard Power BI with sample reports that showcase its capabilities. Pre-built data models encompassing 250+ standard data tables from Dynamics 365 can be extended to include your own data.
