

Get more from your SAP investments to drive smarter connected manufacturing

ENHANCE SAP WITH MICROSOFT POWER PLATFORM

Unlock the full value of SAP with Microsoft's low-code tools that bring the best of SAP and Power Platform together

Manufacturers are under pressure to boost output against a backdrop of acute global skills shortages, supply chain disruptions, rapidly changing product portfolios and new sustainability imperatives. But the business climate is putting pressure on budgets. Incremental, agile initiatives can help by creating new processes and digitizing existing manual processes. Unfortunately, adding new capabilities to your SAP platform can be time-consuming and

create a high maintenance and update workload, driving up the total cost of ownership.

Microsoft Power Platform uses low code to free up untapped value locked within SAP investments by empowering non-technical workers and enabling you to create a culture of citizen developers.

What can Power Platform help you achieve with SAP?

1 Do more with less

Increase collaboration around SAP data with native Microsoft 365 integrations (e.g., Office, Teams) to drive better decision-making.

2 Reduce costs

Lower complexity in manufacturing processes with always-on, end-to-end automation. Leverage lower cost, more abundant resources to scale beyond SAP.

3 Enable safe citizen development

Reduce risk with comprehensive platform governance by enabling business users to build apps and automation to unlock organizational capabilities.

Power Platform: A transformation platform for everyone

Power Apps

Create applications and business processes

Power Automate

Use automated workflows and approvals

Power BI

Analyze and visualize data from multiple apps and bots

Copilot Studio*

Use virtual assistants and intelligent chatbots

*The capabilities and features of Power Virtual Agents are now part of [Microsoft Copilot Studio](#).

Key manufacturing use cases

Supply chain management

- Forecast supply needs
- Automate procurement
- AI-enable control towers

Production management

- Track production
- Streamline material swaps
- Boost quality control

Performance management

- Accelerate inspections and audits
- Enhance ESG reporting
- Deliver better field services

People management

- Improve employee onboarding
- Reduce shift management complexity
- Empower frontline workers

...and more.

Let Avanade help you tap into new business value through seamless and secure collaboration in the flow of work

Use Power Platform to build apps that are simple to use with a great user experience, whether you're adapting to new processes or automating existing manual processes.

Avanade's SAP integration approach and pre-built apps and integration patterns make leveraging capabilities seamless with your SAP environment.

1

No-code

Drag-and-drop experiences that are like PowerPoint

2

Low-code

Drag-and-drop plus Excel-like formulas for functionality

3

Code-first

Professional development and extensibility across Microsoft

Why Avanade?

- Winner: Microsoft Partner of the Year 2024 – Global SI – 19th year; Global SAP RISE on Microsoft Cloud; Global Industry | Mobility
- Finalist: Microsoft Partner of the Year 2024 – Global Low Code Application Development; Global Industry | Manufacturing
