

Security Risk Assessment

Uncover your risk profile and enhance your cyber resilience

In today's rapidly evolving digital landscape, organizations are faced with the critical challenge of understanding and managing their overall security posture. Whether responding to security breaches, preparing for audits, or enhancing visibility and control, you need expert support to navigate these complex risks.

In partnership with Tanium, Avanade offers a comprehensive Security Risk Assessment designed to provide IT security leaders with a clear view of their organization's risk posture.

Endpoints are the ultimate security battleground

of enterprises lack visibility or have inaccurate information on up to 20% of endpoints

Vanson Bourne & Tanium research

94%

Driving security improvements with actionable insights

Our Risk Assessment empowers CIOs and CISOs to identify, prioritize, and mitigate security risks. We help you outline your key risks and vulnerabilities, and come up with a tailored remediation plan. You'll gain proactive strategies to defend against evolving cyber threats, including ransomware, insider threats, and system vulnerabilities.

Key Benefits:

Complete, real-time visibility across your infrastructure

Faster, scalable patching to address vulnerabilities

Enhanced collaboration between operations and security teams

Cost-effective improvements in overall security posture

How we can help

Through an analysis of key risk factors, cyber hygiene metrics, and existing security controls, we deliver an unbiased evaluation of your IT environment. Our approach is thorough and holistic:

Day 1	Week 1	Week 2
Discovery call	Risk assessment	Comprehensive report
Start with a complimentary 2-hour discovery call to connect with one of our security experts and discuss the specific challenges you're looking to address via our risk assessment.	We work with you and prime your environment for seamless agent deployment. Our agents diligently gather data from your environment.	After conducting a thorough analysis, we provide a report that outlines your enterprise risks and vulnerabilities. It will highlight areas to work on, best practices and guidance on next steps so you can understand how to best prioritize your security risks effectively.

By the end of the 2-week assessment, you will receive the following:

- **Executive Summary:** A concise overview including a composite risk score, detailed asset inventory, a customized implementation plan, and an analysis of Log4j exposure.
- **Risk Vector Analysis:** In-depth evaluation of critical vulnerabilities such as system weaknesses, compliance gaps, risks of lateral movement, data exposure, and flaws in security protocols.
- **Comprehensive Report:** Clear identification of compensating controls, asset criticality levels, recommendations for endpoint hardening, and analysis of antivirus/antimalware protection gaps.
- **Cyber Hygiene Metrics:** Detailed insights into asset inventory, patch management status, vulnerability exposure, and software utilization efficiency.

Avanade

Leader in the IDC MarketScape
Worldwide Cybersecurity
Consulting Services 2024

19x Winner of Microsoft
Global SI Partner of the Year

Tanium

Endpoint Security **winner** at the
2023 CISO Choice Awards

Winner for "Best Security Solution
in Risk Identification" in the 2023
Cloud Security Awards

Why Avanade?

Together, Avanade a leading Microsoft Security Services provider, and Tanium, a leader in endpoint management – empower you to strengthen your cyber resilience.
